

There is Simply
No Comparison ...
Stiff Electrodes Don't
Adhere or Conform

The **Axelgaard** advantage ...

Axelgaard Manufacturing Co., Ltd.

is dedicated to customer
satisfaction through the
production of premier
electrodes and components
by incorporating the latest in
materials and technology.

Because of this
commitment to the correct
application of technology
and excellent customer service,
Axelgaard Manufacturing has
become the world leader in the manufacture of
neurostimulation electrodes and components.

Made in USA

Technology is the
Axelgaard
advantage ...

ValuTrode[®]LITE
is another
Axelgaard difference.

ValuTrode[®]LITE

Neurostimulation

Electrodes Provide

Conformability

in an Ultra Thin

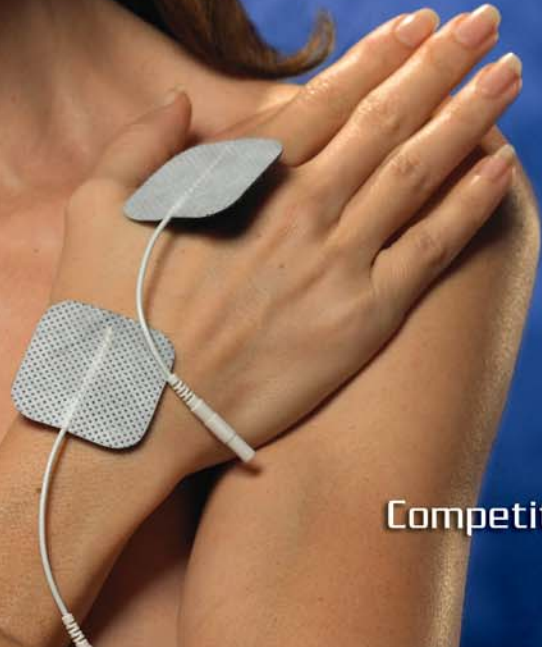

and Economical

Carbon Film Electrode

The Low-Profile Design Allows
ValuTrode[®]LITE
Neurostimulation
Electrodes to
Conform to
Body Contours

ValuTrode[®]LITE

Competitor

There's a difference between **ValuTrode**[®]LITE and other electrodes. The difference is in the design ...

Dare to Compare

Low profile, high performance ...
that is the **ValuTrode**[®]LITE difference.

The technology and the distinctive features offer an effective and comfortable electrode that you can rely on to perform.

- New design maximizes flexibility to ensure conformity and comfort.
- The innovative anti-lift adhesive rim gently adheres to the skin to reduce edge roll up and assures skin contact.
- The advanced **MultiStick**[®] **Gel** used on the **ValuTrode**[®]LITE is electrically matched to the conductive film for stimulation comfort.
- This scientific blend of materials is effective and durable, which assures the optimum treatment in Neurostimulation therapy while providing complete patient satisfaction.

No detail of comfort, conformity, safety or performance has been overlooked.

Made in the U.S.A.

With **ValuTrode**[®]LITE *less is more.*

Smartly Designed

- A unique blend of Axelgaard signature innovation goes into enhancing patient stimulation comfort.
- Oversized edge for increased skin contact.
- The safety design border reduces stinging, edge biting and roll ups.

The sleek profile maximizes flexibility and conformity.

Anti-lift adhesive safety border gently adheres to the skin reducing edge roll up, assuring skin contact.

Finally, a newly designed electrode that does not sacrifice quality.
